Subject index

Adhesion

Model epoxy/metal-oxide chemical interactions: diethanolamine on oxidized copper and aluminum, J.A. Kelber and R.K. Brow 59 (1992) 273

Alkali metals

Potassium-promoted oxidation of Si(111) at elevated temperatures, G. Boishin and L. Surnev 59 (1992) 111

Alloys

XPS study of the passive films formed on nitrogen-implanted austenitic stainless steels, P. Marcus and M.E. Bussell 59 (1992) 7

Surface studies of the oxidation behavior of Al-stabilized Ti–Cu alloys, J. Patscheider, T. Mebrahtu, D.L. Cocke, R.B. Wright and D.G. Naugle 59 (1992) 69

The formation of boron nitride on Fe–37Ni alloy, C.A. Long and H.J. Grabke 59 (1992) 207

Aluminium

XPS studies of interfaces between γ-glycidoxypropyltrimethoxysilane and aluminum surfaces, Y.L. Leung, M.Y. Zhou, P.C. Wong, K.A.R. Mitchell and T. Foster 59 (1992) 23

Aluminium oxide

Characterization of evaporated germanium films by inelastic electron tunneling spectroscopy, M. Higo, M. Isobata and S. Kamata 59 (1992) 219

Amorphous materials

Surface studies of the oxidation behavior of Al-stabilized Ti–Cu alloys, J. Patscheider, T. Mebrahtu, D.L. Cocke, R.B. Wright and D.G. Naugle 59 (1992) 69

Annealing

Characterization of single crystalline CdTe surface, S. Kohiki, K. Nishikura, T. Wada and T. Hirao 59 (1992) 39

Substrate interdiffusion in $Tl_2Ba_2CaCu_2O_8$ thin films and its effects on microwave device performance, K.H. Young, G.G. Firpo, E.J. Smith and C.W. Magee 59 (1992) 147

Arsenic

Electron irradiation of silicon dioxide: a non-destructive measurement of the in-depth induced compositional changes, L. Calliari and F. Marchetti 59 (1992) 79

Atomic force microscopy

Surface reconstruction of UV-laser irradiated poly(ethylene terephthalate) by atomic force microscopy, L. Wefers, D. Knittel, D. Bosbach, W. Rammensee and E. Schollmeyer 59 (1992) 267

Auger electron spectroscopy

The adsorption of a new derivative of mercaptothiazole on copper studied by XPS and AES, G. Contini, S. Turchini, V. Di Castro, G. Polzonetti and A.M. Marabini 59 (1992) 1

Electron-beam microprobe analysis of the wear behavior of sputter-deposited MoS_2 coatings, P.D. Ehni and I.L. Singer 59 (1992) 45

Surface studies of the oxidation behavior of Al-stabilized Ti–Cu alloys, J. Patscheider, T. Mebrahtu, D.L. Cocke, R.B. Wright and D.G. Naugle 59 (1992) 69

Electron irradiation of silicon dioxide: a non-destructive measurement of the

in-depth induced compositional changes, L. Calliari and F. Marchetti 59 (1992) 79
Potassium-promoted oxidation of Si(111) at elevated temperatures, G. Boishin and L. Surnev 59 (1992) 111
The oxygen adsorption and the initial oxidation of indium, D.-X. Dai, F.-R. Zhu, I. Davoli and S. Stizza 59 (1992) 195
The formation of boron nitride on Fe–37Ni alloy, C.A. Long and H.J. Grabke 59 (1992) 207
Analysis of oxygen binding-energy variations for BaO on W, G.A. Haas, A. Shih, D. Mueller and R.E. Thomas 59 (1992) 227
Preparation of monolayers of Re and Pt on metal substrates using a pulsed metal plasma deposition source, C. Kim, D.F. Ogletree, M.B. Salmeron, X. Godechot, G.A. Somorjai and I.G. Brown 59 (1992) 261
Plasma-enhanced chemical vapor deposition of phosphorus nitride thin films: Auger spectroscopy characterization, J.L. Leclercq, J. Durand, L. Cot, R. Berjoan and C. Dupuy 59 (1992) 289

Barium

Analysis of oxygen binding-energy variations for BaO on W, G.A. Haas, A. Shih, D. Mueller and R.E. Thomas 59 (1992) 227

Boron nitride

The formation of boron nitride on Fe–37Ni alloy, C.A. Long and H.J. Grabke 59 (1992) 207

Cadmium telluride

Characterization of single crystalline CdTe surface, S. Kohiki, K. Nishikura, T. Wada and T. Hirao 59 (1992) 39

Carbon

Studies on carbon deposition in $Ar–CH_4$ plasmas with optical emission spectroscopy and X-ray photoelectron spectroscopy, K. Tsuji and K. Hirokawa 59 (1992) 31
The thermal stability of perfluoropolyethers on carbon surfaces, G.H. Vurens and C.M. Mate 59 (1992) 281

Carbon monoxide

New evidence for formate mechanisms of CO hydrogenation over $Pd–Mg^{2+}/SiO_2$ catalysts, Y.-F. Shen and K.H. Huang 59 (1992) 187

Catalysis

Raman investigation of the standard Pt/SiO_2 catalyst EUROPT-1, G.W. Graham, W.H. Weber and K. Otto 59 (1992) 87
New evidence for formate mechanisms of CO hydrogenation over $Pd–Mg^{2+}/SiO_2$ catalysts, Y.-F. Shen and K.H. Huang 59 (1992) 187
On the catalytic activity of Ni–Mo–Fe composite surface coatings for the hydrogen cathodes in the industrial electrochemical production of hydrogen, I. Arul Raj 59 (1992) 245
XPS and EDX study on an Ru–KL zeolite hydrogenation catalyst, Y.Y. Liu, W. Zhao, S. Zhang and Y. Fang 59 (1992) 299

Chemical vapour deposition

Plasma-enhanced chemical vapor deposition of phosphorus nitride thin films: Auger spectroscopy characterization, J.L. Leclercq, J. Durand, L. Cot, R. Berjoan and C. Dupuy 59 (1992) 289

Cobalt

Reactive formation of cobalt silicide on single-crystal silicon under rapid electron beam heating, F. Mahmood, H. Ahmed, C. Jeynes and W.P. Gillin 59 (1992) 55

Copper

The adsorption of a new derivative of mercaptothiazole on copper studied by XPS and AES, G. Contini, S. Turchini, V. Di Castro, G. Polzonetti and A.M. Marabini 59 (1992) 1

Corrosion

Effect of RF plasma nitriding time on microhardness and corrosion resistance of 304 stainless steel, M.M.

Ibrahim, F.M. El-Hossary, N.Z. Negm, M. Abed and R.E. Ricker 59 (1992) 253

Diffusion

Linear programmed heating in surface segregation measurements, J. du Plessis and E.C. Viljoen 59 (1992) 171

Electron bombardment

Electron irradiation of silicon dioxide: a non-destructive measurement of the in-depth induced compositional changes, L. Calliari and F. Marchetti 59 (1992) 79

Electron diffraction

Si(001) vicinal surface oxidation in O_2: angle-resolved Si 2p core-level study using synchrotron radiation, F. Rochet, H. Roulet, G. Dufour, S. Carniato, C. Guillot, N. Barrett and M. Froment 59 (1992) 117
The formation of boron nitride on Fe–37Ni alloy, C.A. Long and H.J. Grabke 59 (1992) 207
Preparation of monolayers of Re and Pt on metal substrates using a pulsed metal plasma deposition source, C. Kim, D.F. Ogletree, M.B. Salmeron, X. Godechot, G.A. Somorjai and I.G. Brown 59 (1992) 261

Electron energy loss spectroscopy

The oxygen adsorption and the initial oxidation of indium, D.-X. Dai, F.-R. Zhu, I. Davoli and S. Stizza 59 (1992) 195

Electron microscopy

Characterization of single crystalline CdTe surface, S. Kohiki, K. Nishikura, T. Wada and T. Hirao 59 (1992) 39
Electron-beam microprobe analysis of the wear behavior of sputter-deposited MoS_2 coatings, P.D. Ehni and I.L. Singer 59 (1992) 45
Reactive formation of cobalt silicide on single-crystal silicon under rapid electron beam heating, F. Mahmood, H. Ahmed, C. Jeynes and W.P. Gillin 59 (1992) 55
Si(001) vicinal surface oxidation in O_2: angle-resolved Si 2p core-level study using synchrotron radiation, F. Rochet, H. Roulet, G. Dufour, S. Carniato, C. Guillot, N. Barrett and M. Froment 59 (1992) 117
Analysis of fly-ash deposition on nickel, T. Ersez, J. Liesegang and G.L. Nyberg 59 (1992) 163
Characterization of thermally oxidized Ta/GaAs Schottky barrier structures prepared by low energy RF sputtering with X-ray photoemission, TEM and optical transmittance measurements, P. Gladkov, K. Varblianska, Ts. Marinova, V. Krastev and J. Stoemenos 59 (1992) 179
Surface peculiarities of vanadium oxides grown in the field of laser light, N.I. Kinawy, L. Nánai, R. Vajtai and I. Hevesi 59 (1992) 201
Plasma-enhanced chemical vapor deposition of phosphorus nitride thin films: Auger spectroscopy characterization, J.L. Leclercq, J. Durand, L. Cot, R. Berjoan and C. Dupuy 59 (1992) 289

Etching

Characterization of single crystalline CdTe surface, S. Kohiki, K. Nishikura, T. Wada and T. Hirao 59 (1992) 39
Ultraviolet photoelectron spectroscopic study of the surface etching of air-oxidized hydrogenated amorphous silicon by aqueous hydrofluoric acid solution, T. Bekkay, E. Sacher and A. Yelon 59 (1992) 239

Evaporation

Characterization of evaporated germanium films by inelastic electron tunneling spectroscopy, M. Higo, M. Isobata and S. Kamata 59 (1992) 219
Preparation of monolayers of Re and Pt on metal substrates using a pulsed metal plasma deposition source, C. Kim, D.F. Ogletree, M.B. Salmeron, X. Godechot, G.A. Somorjai and I.G. Brown 59 (1992) 261

Field emission

Current stochasticity of field emission of charge from traps in the transition layer of implanted MIS structures, Yu.V. Gomeniuk, R.N. Litovski, V.S. Lysenko, I.N. Osiyuk and I.P. Tyagulski 59 (1992) 91

Gallium antimonide

Photoluminescence study of gallium antimonide crystals grown by vertical Bridgman method, S. Basu, U.N. Roy, B.M. Arora and A.K. Srivastava 59 (1992) 159

Gallium arsenide

Characterization of thermally oxidized Ta/GaAs Schottky barrier structures prepared by low energy RF sputtering with X-ray photoemission, TEM and optical transmittance measurements, P. Gladkov, K. Varblianska, Ts. Marinova, V. Krastev and J. Stoemenos 59 (1992) 179

Germanium

Characterization of evaporated germanium films by inelastic electron tunneling spectroscopy, M. Higo, M. Isobata and S. Kamata 59 (1992) 219

Hydrides

Characterization of evaporated germanium films by inelastic electron tunneling spectroscopy, M. Higo, M. Isobata and S. Kamata 59 (1992) 219

Hydrocarbons

XPS study of a SiC film produced on Si(100) by reaction with a C_2H_2 beam, I. Kusunoki and Y. Igari 59 (1992) 95

Indium

The oxygen adsorption and the initial oxidation of indium, D.-X. Dai, F.-R. Zhu, I. Davoli and S. Stizza 59 (1992) 195

Interfaces

XPS studies of interfaces between γ-glycidoxypropyltrimethoxysilane and aluminum surfaces, Y.L. Leung, M.Y. Zhou, P.C. Wong, K.A.R. Mitchell and T. Foster 59 (1992) 23

Characterization of thermally oxidized Ta/GaAs Schottky barrier structures prepared by low energy RF sputtering with X-ray photoemission, TEM and optical transmittance measurements, P. Gladkov, K. Varblianska, Ts. Marinova, V. Krastev and J. Stoemenos 59 (1992) 179

Ion implantation

XPS study of the passive films formed on nitrogen-implanted austenitic stainless steels, P. Marcus and M.E. Bussell 59 (1992) 7

Ion scattering

Reactive formation of cobalt silicide on single-crystal silicon under rapid electron beam heating, F. Mahmood, H. Ahmed, C. Jeynes and W.P. Gillin 59 (1992) 55

Iron

Surface reactions at 300–750 K in the iron–oxygen–water system studied by SIMS, G. Hultquist, M. Seo, Q. Lu, G.K. Chuah and K.L. Tan 59 (1992) 135

On the catalytic activity of Ni–Mo–Fe composite surface coatings for the hydrogen cathodes in the industrial electrochemical production of hydrogen, I. Arul Raj 59 (1992) 245

Laser processing

Surface peculiarities of vanadium oxides grown in the field of laser light, N.I. Kinawy, L. Nánai, R. Vajtai and I. Hevesi 59 (1992) 201

Surface reconstruction of UV-laser irradiated poly(ethylene terephthalate) by atomic force microscopy, L. Wefers, D. Knittel, D. Bosbach, W. Rammensee and E. Schollmeyer 59 (1992) 267

Lead

Photoelectron studies of machined brass surfaces, A.W. Potts, J.P. Merrison, A.D. Tournas and A. Yacoot 59 (1992) 63

Magnesium

New evidence for formate mechanisms of CO hydrogenation over Pd–Mg^{2+}-/SiO_2 catalysts, Y.-F. Shen and K.H. Huang 59 (1992) 187

Mass spectroscopy

New evidence for formate mechanisms of CO hydrogenation over Pd–Mg^{2+}/SiO_2 catalysts, Y.-F. Shen and K.H. Huang 59 (1992) 187
The thermal stability of perfluoropolyethers on carbon surfaces, G.H. Vurens and C.M. Mate 59 (1992) 281

Metal–oxide–semiconductor structure (MOS)

Current stochasticity of field emission of charge from traps in the transition layer of implanted MIS structures, Yu.V. Gomeniuk, R.N. Litovski, V.S. Lysenko, I.N. Osiyuk and I.P. Tyagulski 59 (1992) 91
Capacitance–voltage measurements on MOS capacitors fabricated on polycrystalline silicon wafers, C.H. Ling and T.M. Tay 59 (1992) 105

Metals

Model epoxy/metal-oxide chemical interactions: diethanolamine on oxidized copper and aluminum, J.A. Kelber and R.K. Brow 59 (1992) 273

Methane

Studies on carbon deposition in $Ar–CH_4$ plasmas with optical emission spectroscopy and X-ray photoelectron spectroscopy, K. Tsuji and K. Hirokawa 59 (1992) 31

Molybdenum

On the catalytic activity of Ni–Mo–Fe composite surface coatings for the hydrogen cathodes in the industrial electrochemical production of hydrogen, I. Arul Raj 59 (1992) 245

Multilayers

Preparation of monolayers of Re and Pt on metal substrates using a pulsed metal plasma deposition source, C. Kim, D.F. Ogletree, M.B. Salmeron, X. Godechot, G.A. Somorjai and I.G. Brown 59 (1992) 261

Nickel

Analysis of fly-ash deposition on nickel, T. Ersez, J. Liesegang and G.L. Nyberg 59 (1992) 163
On the catalytic activity of Ni–Mo–Fe composite surface coatings for the hydrogen cathodes in the industrial electrochemical production of hydrogen, I. Arul Raj 59 (1992) 245

Nitrides

Effect of RF plasma nitriding time on microhardness and corrosion resistance of 304 stainless steel, M.M. Ibrahim, F.M. El-Hossary, N.Z. Negm, M. Abed and R.E. Ricker 59 (1992) 253
Plasma-enhanced chemical vapor deposition of phosphorus nitride thin films: Auger spectroscopy characterization, J.L. Leclercq, J. Durand, L. Cot, R. Berjoan and C. Dupuy 59 (1992) 289

Nitrogen

XPS study of the passive films formed on nitrogen-implanted austenitic stainless steels, P. Marcus and M.E. Bussell 59 (1992) 7

Organic substances

The adsorption of a new derivative of mercaptothiazole on copper studied by XPS and AES, G. Contini, S. Turchini, V. Di Castro, G. Polzonetti and A.M. Marabini 59 (1992) 1

Oxidation

Surface studies of the oxidation behavior of Al-stabilized Ti–Cu alloys, J. Patscheider, T. Mebrahtu, D.L. Cocke, R.B. Wright and D.G. Naugle 59 (1992) 69
Potassium-promoted oxidation of Si(111) at elevated temperatures, G. Boishin and L. Surnev 59 (1992) 111
Si(001) vicinal surface oxidation in O_2: angle-resolved Si 2p core-level study using synchrotron radiation, F. Rochet, H. Roulet, G. Dufour, S. Carniato, C. Guillot, N. Barrett and M. Froment 59 (1992) 117

The oxygen adsorption and the initial oxidation of indium, D.-X. Dai, F.-R. Zhu, I. Davoli and S. Stizza 59 (1992) 195

Oxides

Analysis of oxygen binding-energy variations for BaO on W, G.A. Haas, A. Shih, D. Mueller and R.E. Thomas 59 (1992) 227
Model epoxy/metal-oxide chemical interactions: diethanolamine on oxidized copper and aluminum, J.A. Kelber and R.K. Brow 59 (1992) 273

Oxygen

Potassium-promoted oxidation of Si(111) at elevated temperatures, G. Boishin and L. Surnev 59 (1992) 111
Si(001) vicinal surface oxidation in O_2: angle-resolved Si 2p core-level study using synchrotron radiation, F. Rochet, H. Roulet, G. Dufour, S. Carniato, C. Guillot, N. Barrett and M. Froment 59 (1992) 117
Surface reactions at 300–750 K in the iron–oxygen–water system studied by SIMS, G. Hultquist, M. Seo, Q. Lu, G.K. Chuah and K.L. Tan 59 (1992) 135
The oxygen adsorption and the initial oxidation of indium, D.-X. Dai, F.-R. Zhu, I. Davoli and S. Stizza 59 (1992) 195

Palladium

New evidence for formate mechanisms of CO hydrogenation over Pd–Mg^{2+}-/SiO_2 catalysts, Y.-F. Shen and K.H. Huang 59 (1992) 187

Phosphorus

Plasma-enhanced chemical vapor deposition of phosphorus nitride thin films: Auger spectroscopy characterization, J.L. Leclercq, J. Durand, L. Cot, R. Berjoan and C. Dupuy 59 (1992) 289

Photoelectron spectroscopy

The adsorption of a new derivative of mercaptothiazole on copper studied by XPS and AES, G. Contini, S. Turchini, V. Di Castro, G. Polzonetti and A.M. Marabini 59 (1992) 1
XPS study of the passive films formed on nitrogen-implanted austenitic stainless steels, P. Marcus and M.E. Bussell 59 (1992) 7
XPS studies of interfaces between γ-glycidoxypropyltrimethoxysilane and aluminum surfaces, Y.L. Leung, M.Y. Zhou, P.C. Wong, K.A.R. Mitchell and T. Foster 59 (1992) 23
Studies on carbon deposition in Ar–CH_4 plasmas with optical emission spectroscopy and X-ray photoelectron spectroscopy, K. Tsuji and K. Hirokawa 59 (1992) 31
Characterization of single crystalline CdTe surface, S. Kohiki, K. Nishikura, T. Wada and T. Hirao 59 (1992) 39
Photoelectron studies of machined brass surfaces, A.W. Potts, J.P. Merrison, A.D. Tournas and A. Yacoot 59 (1992) 63
Surface studies of the oxidation behavior of Al-stabilized Ti–Cu alloys, J. Patscheider, T. Mebrahtu, D.L. Cocke, R.B. Wright and D.G. Naugle 59 (1992) 69
XPS study of a SiC film produced on Si(100) by reaction with a C_2H_2 beam, I. Kusunoki and Y. Igari 59 (1992) 95
Si(001) vicinal surface oxidation in O_2: angle-resolved Si 2p core-level study using synchrotron radiation, F. Rochet, H. Roulet, G. Dufour, S. Carniato, C. Guillot, N. Barrett and M. Froment 59 (1992) 117
Analysis of fly-ash deposition on nickel, T. Ersez, J. Liesegang and G.L. Nyberg 59 (1992) 163
Characterization of thermally oxidized Ta/GaAs Schottky barrier structures prepared by low energy RF sputtering with X-ray photoemission, TEM and optical transmittance measurements, P. Gladkov, K. Varblianska, Ts. Marinova, V. Krastev and J. Stoemenos 59 (1992) 179
Ultraviolet photoelectron spectroscopic study of the surface etching of air-oxidized hydrogenated amorphous silicon by aqueous hydrofluoric acid solution, T. Bekkay, E. Sacher and A. Yelon 59 (1992) 239
Model epoxy/metal-oxide chemical interactions: diethanolamine on oxidized copper and aluminum, J.A. Kelber and R.K. Brow 59 (1992) 273
XPS and EDX study on an Ru–KL zeolite hydrogenation catalyst, Y.Y. Liu, W. Zhao, S. Zhang and Y. Fang 59 (1992) 299

Photon emission

Photoluminescence study of gallium antimonide crystals grown by vertical Bridgman method, S. Basu, U.N. Roy, B.M. Arora and A.K. Srivastava 59 (1992) 159

Plasma processing

Studies on carbon deposition in $Ar-CH_4$ plasmas with optical emission spectroscopy and X-ray photoelectron spectroscopy, K. Tsuji and K. Hirokawa 59 (1992) 31

Effect of RF plasma nitriding time on microhardness and corrosion resistance of 304 stainless steel, M.M. Ibrahim, F.M. El-Hossary, N.Z. Negm, M. Abed and R.E. Ricker 59 (1992) 253

Platinum

Raman investigation of the standard Pt/SiO_2 catalyst EUROPT-1, G.W. Graham, W.H. Weber and K. Otto 59 (1992) 87

Preparation of monolayers of Re and Pt on metal substrates using a pulsed metal plasma deposition source, C. Kim, D.F. Ogletree, M.B. Salmeron, X. Godechot, G.A. Somorjai and I.G. Brown 59 (1992) 261

Polymers

XPS studies of interfaces between γ-glycidoxypropyltrimethoxysilane and aluminum surfaces, Y.L. Leung, M.Y. Zhou, P.C. Wong, K.A.R. Mitchell and T. Foster 59 (1992) 23

Surface reconstruction of UV-laser irradiated poly(ethylene terephthalate) by atomic force microscopy, L. Wefers, D. Knittel, D. Bosbach, W. Rammensee and E. Schollmeyer 59 (1992) 267

Model epoxy/metal-oxide chemical interactions: diethanolamine on oxidized copper and aluminum, J.A. Kelber and R.K. Brow 59 (1992) 273

The thermal stability of perfluoropolyethers on carbon surfaces, G.H. Vurens and C.M. Mate 59 (1992) 281

Raman scattering

Raman investigation of the standard Pt/SiO_2 catalyst EUROPT-1, G.W. Graham, W.H. Weber and K. Otto 59 (1992) 87

Rhenium

Preparation of monolayers of Re and Pt on metal substrates using a pulsed metal plasma deposition source, C. Kim, D.F. Ogletree, M.B. Salmeron, X. Godechot, G.A. Somorjai and I.G. Brown 59 (1992) 261

Secondary ion mass spectroscopy

Surface reactions at 300–750 K in the iron–oxygen–water system studied by SIMS, G. Hultquist, M. Seo, Q. Lu, G.K. Chuah and K.L. Tan 59 (1992) 135

Substrate interdiffusion in $Tl_2Ba_2CaCu_2O_8$ thin films and its effects on microwave device performance, K.H. Young, G.G. Firpo, E.J. Smith and C.W. Magee 59 (1992) 147

Silicides

Reactive formation of cobalt silicide on single-crystal silicon under rapid electron beam heating, F. Mahmood, H. Ahmed, C. Jeynes and W.P. Gillin 59 (1992) 55

Silicon

Current stochasticity of field emission of charge from traps in the transition layer of implanted MIS structures, Yu.V. Gomeniuk, R.N. Litovski, V.S. Lysenko, I.N. Osiyuk and I.P. Tyagulski 59 (1992) 91

XPS study of a SiC film produced on Si(100) by reaction with a C_2H_2 beam, I. Kusunoki and Y. Igari 59 (1992) 95

Capacitance–voltage measurements on MOS capacitors fabricated on polycrystalline silicon wafers, C.H. Ling and T.M. Tay 59 (1992) 105

Potassium-promoted oxidation of Si(111) at elevated temperatures, G. Boishin and L. Surnev 59 (1992) 111

Si(001) vicinal surface oxidation in O_2: angle-resolved Si 2p core-level study using synchrotron radiation, F. Rochet, H. Roulet, G. Dufour, S. Carni-

ato, C. Guillot, N. Barrett and M. Froment 59 (1992) 117
Ultraviolet photoelectron spectroscopic study of the surface etching of air-oxidized hydrogenated amorphous silicon by aqueous hydrofluoric acid solution, T. Bekkay, E. Sacher and A. Yelon 59 (1992) 239

Silicon carbide

XPS study of a SiC film produced on Si(100) by reaction with a C_2H_2 beam, I. Kusunoki and Y. Igari 59 (1992) 95

Silicon oxide

Electron irradiation of silicon dioxide: a non-destructive measurement of the in-depth induced compositional changes, L. Calliari and F. Marchetti 59 (1992) 79
Raman investigation of the standard Pt/SiO_2 catalyst EUROPT-1, G.W. Graham, W.H. Weber and K. Otto 59 (1992) 87
Current stochasticity of field emission of charge from traps in the transition layer of implanted MIS structures, Yu.V. Gomeniuk, R.N. Litovski, V.S. Lysenko, I.N. Osiyuk and I.P. Tyagulski 59 (1992) 91
Si(001) vicinal surface oxidation in O_2: angle-resolved Si 2p core-level study using synchrotron radiation, F. Rochet, H. Roulet, G. Dufour, S. Carniato, C. Guillot, N. Barrett and M. Froment 59 (1992) 117
New evidence for formate mechanisms of CO hydrogenation over $Pd–Mg^{2+}/SiO_2$ catalysts, Y.-F. Shen and K.H. Huang 59 (1992) 187

Sputter deposition

Electron-beam microprobe analysis of the wear behavior of sputter-deposited MoS_2 coatings, P.D. Ehni and I.L. Singer 59 (1992) 45
Characterization of thermally oxidized Ta/GaAs Schottky barrier structures prepared by low energy RF sputtering with X-ray photoemission, TEM and optical transmittance measurements, P. Gladkov, K. Varblianska, Ts. Marinova, V. Krastev and J. Stoemenos 59 (1992) 179

Sputtering

Surface reactions at 300–750 K in the iron–oxygen–water system studied by SIMS, G. Hultquist, M. Seo, Q. Lu, G.K. Chuah and K.L. Tan 59 (1992) 135

Steel

XPS study of the passive films formed on nitrogen-implanted austenitic stainless steels, P. Marcus and M.E. Bussell 59 (1992) 7
The formation of boron nitride on Fe–37Ni alloy, C.A. Long and H.J. Grabke 59 (1992) 207
Effect of RF plasma nitriding time on microhardness and corrosion resistance of 304 stainless steel, M.M. Ibrahim, F.M. El-Hossary, N.Z. Negm, M. Abed and R.E. Ricker 59 (1992) 253

Superconductivity

Substrate interdiffusion in $Tl_2Ba_2Ca-Cu_2O_8$ thin films and its effects on microwave device performance, K.H. Young, G.G. Firpo, E.J. Smith and C.W. Magee 59 (1992) 147

Tantalum

Characterization of thermally oxidized Ta/GaAs Schottky barrier structures prepared by low energy RF sputtering with X-ray photoemission, TEM and optical transmittance measurements, P. Gladkov, K. Varblianska, Ts. Marinova, V. Krastev and J. Stoemenos 59 (1992) 179

Thermal desorption

Potassium-promoted oxidation of Si(111) at elevated temperatures, G. Boishin and L. Surnev 59 (1992) 111
New evidence for formate mechanisms of CO hydrogenation over $Pd–Mg^{2+}/SiO_2$ catalysts, Y.-F. Shen and K.H. Huang 59 (1992) 187

Thin films

Studies on carbon deposition in $Ar–CH_4$ plasmas with optical emission spectroscopy and X-ray photoelectron

spectroscopy, K. Tsuji and K. Hirokawa 59 (1992) 31
Substrate interdiffusion in $Tl_2Ba_2CaCu_2O_8$ thin films and its effects on microwave device performance, K.H. Young, G.G. Firpo, E.J. Smith and C.W. Magee 59 (1992) 147
Characterization of evaporated germanium films by inelastic electron tunneling spectroscopy, M. Higo, M. Isobata and S. Kamata 59 (1992) 219
On the catalytic activity of Ni–Mo–Fe composite surface coatings for the hydrogen cathodes in the industrial electrochemical production of hydrogen, I. Arul Raj 59 (1992) 245
Surface reconstruction of UV-laser irradiated poly(ethylene terephthalate) by atomic force microscopy, L. Wefers, D. Knittel, D. Bosbach, W. Rammensee and E. Schollmeyer 59 (1992) 267
Plasma-enhanced chemical vapor deposition of phosphorus nitride thin films: Auger spectroscopy characterization, J.L. Leclercq, J. Durand, L. Cot, R. Berjoan and C. Dupuy 59 (1992) 289

Tungsten

Analysis of oxygen binding-energy variations for BaO on W, G.A. Haas, A. Shih, D. Mueller and R.E. Thomas 59 (1992) 227

Tunneling

Characterization of evaporated germanium films by inelastic electron tunneling spectroscopy, M. Higo, M. Isobata and S. Kamata 59 (1992) 219

Vanadium

Surface peculiarities of vanadium oxides grown in the field of laser light, N.I. Kinawy, L. Nánai, R. Vajtai and I. Hevesi 59 (1992) 201

Vanadium oxide

Surface peculiarities of vanadium oxides grown in the field of laser light, N.I. Kinawy, L. Nánai, R. Vajtai and I. Hevesi 59 (1992) 201

Water

Surface reactions at 300–750 K in the iron–oxygen–water system studied by SIMS, G. Hultquist, M. Seo, Q. Lu, G.K. Chuah and K.L. Tan 59 (1992) 135

X-ray diffraction

Analysis of fly-ash deposition on nickel, T. Ersez, J. Liesegang and G.L. Nyberg 59 (1992) 163

X-ray emission

Photoelectron studies of machined brass surfaces, A.W. Potts, J.P. Merrison, A.D. Tournas and A. Yacoot 59 (1992) 63

X-ray spectroscopy

XPS and EDX study on an Ru–KL zeolite hydrogenation catalyst, Y.Y. Liu, W. Zhao, S. Zhang and Y. Fang 59 (1992) 299

Zeolites

XPS and EDX study on an Ru–KL zeolite hydrogenation catalyst, Y.Y. Liu, W. Zhao, S. Zhang and Y. Fang 59 (1992) 299
